Power Automate Fundamentals

Welcome to the course!

Power Automate is a tool by Microsoft that automates repetitive tasks across different apps and services. It's user-friendly, letting you create workflows easily by connecting triggers (like receiving an email) to actions (like sending a message). It works with various Microsoft apps and third-party services, making it versatile for different needs.

Whether you're new to Power Automate or looking to enhance your proficiency, you're in the perfect spot! In this comprehensive course, participants will dive into the world of automation using Power Automate to streamline their workflows and enhance productivity.

The course begins with an introduction to the fundamentals of Power Automate, including its features, capabilities, and benefits. We will learn how to create automated workflows, trigger actions based on specific events, and manage flow runs effectively.
