

Understanding Agile & Scrum at A Deeper Level

Welcome to the course!

This is a beginner to intermediate level course designed for people interested in Agile Project Management based on Scrum Methodologies.

At the end of the course, students will be able to:

Develop a deeper understanding of the principles and values behind Agile and Scrum to create high performance Agile teams and to apply Agile more effectively to a much broader range of projects and business environments

Gain the knowledge and skills to lead Agile project teams based on an in-depth understanding of Agile and Scrum values, principles, practices and solutions of the common challenges.
